90 Seconds to Better Health – Breast Clinic

Diego Cabrera, M.D., Med Center Health Hematology & Oncology

[MUSIC] [NARRATOR]

90 Seconds to Better Health, brought to you by Med Center Health, the largest healthcare provider in the region.

The Med Center Health Hematology and Oncology Breast Clinic streamlines the diagnosis and treatment of breast cancer.

[DR. CABRERA]

When a patient was diagnosed with a breast mass or a breast cancer, care of this patient was very scattered. Patients would have to go from hospital to hospital looking for doctors and trying to get the best care they could. However, now we have a dedicated clinic that we can offer all these services under one roof. That will help us deliver the best care in the best time possible. We also offer genetic testing through the University of Kentucky as well.

[NARRATOR]

Depending on the results of your screening mammogram, we utilize many tools to rule out or make a cancer diagnosis. If cancer is diagnosed, we will work with you to develop a customized plan tailored to your needs. We use a multidisciplinary approach and coordinate with other healthcare providers as needed.

[DR. CABRERA]

Breast cancer is a very common cancer, unfortunately; however, it is a very treatable disease at different stages. Sciences is advancing and in 2022, we have newer treatments to offer patients.

It's important for women age 40 and up to get their screening mammogram yearly. If you haven't had yours done, you can call Med Center at get your appointment today.
