90 Seconds to Better Health – Cancer Care

Jamie Jarboe, M.D., Med Center Health Hematology & Oncology

[MUSIC] [NARRATOR]

90 Seconds to Better Health, brought to you by Med Center Health, the largest healthcare provider in the region.

After a cancer diagnosis, people with cancer and their families have to make a number of decisions about medical treatment.

[DR. JARBOE]

Local care is really important within the cancer realm because often the treatments make you feel poorly; and so, having to spend extra time traveling to a destination that's an hour or two away is unnecessary when we can give those treatments here locally. The other thing that's important about local care is that if you feel poorly in between your treatments there is someone available to you close by who can help with that, either seeing you or providing you with other services to get you feeling better in between those treatment times.

[NARRATOR]

Med Center Health is a member of the UK Markey Cancer Center Affiliate Network and a UK Markey Cancer Research Network in order to provide the most advanced cancer care to Southcentral Kentucky.

[DR. JARBOE]

We are here for the journey. So, we are here to take you from diagnosis through your treatment. We are here for you, we are here for your family. We form these really nice patient/provider relationships in order to help you sort of in all aspects of this journey.
