## 90 Seconds to Better Health – The Vein Clinic

*Magendran Danapal, M.D., Vascular Surgeon*

[MUSIC] [NARRATOR]

90 Seconds to Better Health, brought to you by Med Center Health, the largest healthcare provider in the region.

Varicose and spider veins are very common – around one third of all adults have varicose veins. The Med Center Health Vein Clinic is a comprehensive vein care center that specializes in advanced, minimally-invasive treatments of varicose veins, spider veins and any symptoms of vein disease.

[DR. DANAPAL]

If you have swelling in your legs, achiness, tiredness – these are all symptoms of vein disease. When we treat patients with these symptoms, as they improve patients automatically see significant improvement in their quality of life just from resolution of the symptoms. We offer that service right here at The Medical Center. We are the only vein clinic here that is attached to a hospital and therefore we can avail of the hospital services, such as CT scans and wound care when appropriate. We are also staffed by a vascular surgeon and two vascular nurse practitioners.

[NARRATOR]

Med Center Health's team of experts do their best to have your legs healthier and looking good with almost no pain. Most treatment sessions last less than an hour and you can return to normal activities right away.

[DR. DANAPAL]

To see us at the Vein Clinic, you don't need a referral. You just need to call us and we'll get you set up with an appointment.
