## Nursing at Med Center Health

*Leslie Rossetter, RN, MSN, CNML, Director of Medical Services*

[LESLIE ROSSETTER]

Over my 15-year career here at Med Center, I've worked in various places, and we have lots of opportunities. We have our women's services department, our open heart surgery, and we are a PCI accredited chest pain center. STEMI services, Cath Lab services – we have lots of opportunity throughout our system, as well, with our rural hospitals and our long-term care facility and our LTAC facility. So, there's lots of different opportunities, if anything you might want that we would have here for you at Med Center Health.
