

Med Center Health®

[VIDEO TRANSCRIPT]

Welcome to Med Center Health

[MUSIC]

[NARRATOR]

For nearly 100 years, Med Center Health has provided medical and surgical care to sick and injured persons without regard to race, religion or ability to pay. Our mission is to care for people and improve the quality of life in the communities we serve. Since our beginning as the Bowling Green City Hospital in 1926, we have grown into the area's largest healthcare system with over 3,500 employees, a medical staff of more than 400 physicians and six hospitals serving 12 counties. Through innovative partnerships with Western Kentucky University and the University of Kentucky College of Medicine-Bowling Green Campus, we have dedicated ourselves to educating and training the next generation of healthcare professionals to serve our region and beyond.

Med Center Health is committed to providing quality healthcare. Among our many accreditations, The Medical Center at Bowling Green – our flagship hospital – is an accredited chest pain center, stroke center and cancer program. Med Center Health provides a holistic, patient-centered approach to care by offering the latest in advanced technology and specialty care services that our patients need. The best care is available right here.

At Med Center Health, we believe people are our greatest resource. Our team of diverse and compassionate healthcare professionals are committed to our mission and we welcome the opportunity to stand beside our partners, providers and staff as we work collaboratively to improve the lives of others.
